As Bangladesh's economy has grown in size over the past few decades, the country's capital market has not seen a similar increase in size, although every sector of the economy has large long-term investment needs. The capital market has an important role in building a solid foundation of the country's economy. BSEC is committed to bring the desired growth in the capital market of Bangladesh in keeping with the economy and GDP.

In the recent crisis, the development of the capital market is essential for establishing a strong economy. This necessity cannot be denied in any way. Therefore, the strong emergence of the capital market as one of the main sources of capital supply in various fields including the industrial and development sectors is the demand of the time. BSEC has already started working to introduce the capital market as the main source of long-term financing and to establish the capital market as a strong medium as a source of investment.

I have been honored to be given this responsibility at a critical time in the country. We have to go through some problems and possibilities.
